

OMNITRONIC VC-11 Volume Controller, passive

Passive monitor controller with mute and mono summation

Art.n.: 10355796

GTIN: 4026397743883

Descrizione :

The VC-11 is a passive stereo monitor controller for professional computer-based studio applications and home use. It is designed for a precise volume control of analog audio signals and is inserted between analog signal sources and active speakers or amplifiers, e.g. between a PC sound card and monitor speakers. It is ideal for quick and easy level control when you monitor the audio output of your PC sound card or DAW (digital audio workstation).

Using a large rotary control, the VC-11 lets you attenuate volume levels conveniently and you no longer have to rely on a mouse and screen. Reducing level from your software only reduces the audio bit depth. The signal path is completely passive and does not require power supply. The VC-11 simply delivers an attenuated signal without compromising your audio which is one of the main benefits of passive volume attenuation. Thus, you can keep your software masters at unity and attenuate the audio to your active monitors precisely with the VC-11 while maintaining maximum audio resolution.

The VC-11 features balanced combined XLR and 6.3 mm jack inputs and 6.3 mm jack outputs, plus mini jack connectors as well as mute and mono switches. It will fit any desktop thanks to its compact size.

Features :

- Regolazione precisa del volume dei segnali audio analogici
- Adatto, ad esempio, tra la scheda audio del PC e le casse attive o gli amplificatori
- Grande regolatore di livello
- Passivo, non richiede alimentazione
- Custodia per mixer

Logistica

EAN / GTIN: 4026397743883

Peso : 0,69 kg

Lunghezza : 0.24 m

Larghezza : 0.17 m

Altezza : 0.07 m

Dati tecnici :

Intervallo di frequenza:	20 - 20000 Hz
Colore della custodia:	Nero opaco
Collegamenti:	Ingresso: line via 2 x presa combinata XLR a 3 poli/jack da 6,35 mm (F) versione da incasso Ingresso: line via 1 x Presa jack (stereo) da 3,5 mm versione da incasso Uscita: line via 2 x Presa jack (mono) da 6,3 mm versione da incasso Uscita: line via 1 x Presa jack (stereo) da 3,5 mm versione da incasso
Canali:	Canale di ingresso: 1 x Mono + Stereo via XLR o jack, Interruttore stereo mono, interruttore silenzioso Uscita master: 1 x Mono + Stereo via jack, channel control via manopola
Struttura della custodia:	Custodia per mixer
Misure:	Larghezza: 16 cm Profondità: 10,8 cm Altezza: 6,3 cm
Peso:	0,510 kg

Contenuto della confezione:

1 x Dispositivo
