Descrizione :

This kit upgrades compatible fog machines up to 900 watts. The kit includes a 5-meter-long fog hose, an adapter and a set of screws. The adapter is suitable for circular outlet nozzles with a diameter of 20 to 70 mm. It can be attached to the nozzle with its hexagonal screws and has a mandrel for connecting the fog hose. The fog can now be placed away from the fog machine, making it easy to create a spooky atmosphere for haunted scenes on Halloween. Attach the hose to a tripod next to your DJ desk for impressive special effects in combination with a lighting system.
