Descrizione :

Artificial fan palms are perfect for Mediterranean palm decorations in wellness facilities, restaurants and cafes. But also at summer parties or in your own four walls they should not be missing as a summery, low-maintenance plant decoration. Especially in the implementation of the living trend URBAN JUNGLE they are a "must have".

This detailed replica of a real fan palm impresses especially with its large, fan-shaped spreading ribbed leaves / fronds in different shades of green. These are made entirely of high-quality plastic and are therefore particularly durable. To achieve a lifelike appearance of the artificial plant, real palm fiber material was included in the processing of the trunk.

Artificial moss serves as a cover for the basic gardener's pot included in the delivery. Thus, it can serve as a stand for a planter, as well as be used independently as a decorative pot. In order to unfold the full beauty of the artificial palm tree, its fronds only need to be slightly bent into shape.
