

HR#350WB)0164

A photograph of a power supply unit (PSU) with its top cover removed, revealing internal components. A large yellow electrolytic capacitor is prominent on the left, with the text 'BLH-PC0350W' visible. To its right is a black heat sink. Further right is a transformer with two yellow windings. A black cylindrical component, likely a filter capacitor, is labeled 'SAMXON'. The unit is mounted on a blue printed circuit board (PCB) with various other components and connectors visible. The entire unit is housed in a black metal chassis.
