Description:

With its extra-bright beams in three different colors and white, this hybrid beam effect cuts even through the dense air in a club, home party room etc. A semicircular arrangement of RGB LEDs and white LEDs for strobe effects allows for light shows of any kind which can be easily coordinated via the four operating buttons: One of three preset programs can be played either in automatic or sound-controlled mode via the built-in microphone. If you choose the latter, the rhythm of the music sets the tone for the color changes - this works for both fast and slow genres.

Since the Mini D-6 Hybrid is a particularly light and small spot, you can easily take it with you and use the mounting bracket to install it almost everywhere you like. Of course, the power cord and plug are included so you get everything you need for your color explosion in one compact set!
