### Description:

Small David becomes a light giant!

The story of the little one who is first underestimated because of his height and who suddenly shows off big capabilities and then wins praise and admiration, happens all the time. This also goes for our EUROLITE LED bar. Beside its quite decent size, the guiding of light is immense. Responsible for that are 252 white LEDs which truly convince with their luminosity. They operate best when used as audience lighting. By doing so, the strobe effect and the color-fading are the most impressive features. The LEDs are sound controlled via a microphone, that way they can adjust to the music easily. The LED bar RGB 252/10 is ideal for bands, stages and for solo entertainers, but it can also be used as a decoration element.

### Features:

- DMX512 control via regular DMX controller
- Sound-control via built-in microphone
