Description:

With its 480 cold white SMD LEDs and the flash frequency adjustable from 1 to 20 Hz, the LED Super Strobe combines stroboscope, blinder and wash effects. It lets you create both dynamic stage shows and the more low-key effects in between with a single fixture. The very wide beam angle of 120° guarantees a great visual experience even from a lateral view. You can choose from three different operation modes: master-slave, stand-alone and DMX mode (1, 2 or 3 DMX channels). The metal housing ensures stability and is equipped with a mounting bracket, 3-pin DMX connectors and a P-Con input and output to connect the fixture to the mains.
