

EUROPALMS Artificial Rock, ROCK LIGHT

For scenery construction or interior design

Art. No.: 83313242

GTIN: 4026397756753

List price: 71.28 €

incl. 19% VAT.

Description:

The decorative rock made of fiberglass-reinforced plastic is particularly light compared to real stones and is used wherever real rocks are too heavy: for example, in scenery construction and in room or shop window designs. Its hollow interior also makes it ideal as a cover for sockets, transformers or for pond pumps and filters outdoors. Using a suitable lamp (not included in the scope of delivery!), the artificial rock can also be illuminated from the inside. During production, special emphasis was placed on a natural color gradient of the imitation stone. Slight deviations in dimensions, structure and color are possible, as with real boulders.

Logistic

EAN / GTIN: 4026397756753

Weight: 1,05 kg

Length: 0.42 m

Width: 0.32 m

Height: 0.32 m

Features:

- The article is delivered ready to stand
- For application areas such as: Decoration
- Suitable for outdoor use
- Each piece is unique
