Caractéristiques:

OSRAM HSD 250/60 4ArXS GY-9.5 2000h

Ampoules

HMI/MSR/HMP/OMI

- Extremely high light output
- Best color rendering
- Light output three to four times higher in comparison to filament light
- Light is generated via an arc between two electrodes
- Spectrum similar to daylight (between 4500 and 6500 K)
- Constant color temperature and color rendering behaviour over the whole lamp life
- Photographic industry
- Halogen metal evaporation lamps provide a spectrum composed of a lot of lines, in contrast to temperature radiators, as halogen-incandescent lamps
- Bon indice de rendu de couleur (IRC)
