Description:

This solid mirror ball motor by Eurolite reflects beautiful light effects on ceilings and walls; without any external lighting! This motor, type MD-1015, has been designed for mirror balls up to 3 kg and is simply screwed to the ceiling or attached to a truss using the optional mounting equipment.

Not only does it steadily rotate the ball with 1.5 rotations per minute but it also illuminates it from above with 3 white LEDs. The reflecting light then covers the room in an infinite sea of moving light dots. Of course, the MD-1015 is delivered ready to use with a power cord, and thanks to the modern LED technology, it is also particularly energy-efficient.
