Description:

A classic!

For football it is a match versus Germany and England. For the music business it is a Beatles or a Stones song: a classic. In the lighting technology there are also classics. One of them is our DJ-Head that is equipped with numerous functions - such as the frost filter for a softer beam or the beam shape effect, for example - and that has really proved itself. Moreover, in comparison with the PHP-series, this washlight is even a bit cheaper. So why always aspiring to innovations while elderly devices manifest their class anew, again and again?
