

Description:

A simple way to power the "DXT DMX Pixel Converter PRO" while configuration on your PC. There is no need for a separate powersupply, just another spare USB port. Do not connect an LED stripe simultaneously to the 4pin connector, or your USB port may be overloaded. Supply only power! For the Configuration of the "DXT DMX Pixel Converter PRO" you will need an additional "USB-DMX512-Interface/Upload Adapter" (51860118)!
