Description:

Ghosts and ghouls can't be missing from any scary story. As lovable or as rather scary and sinister fellows, they belong to the basic equipment of every motto and Halloween party.

The spooky ghost from Europalms is well prepared for its ghostly appearance. With its arms spread out, the eerie figure haunts your premises. Who is not yet frozen with fright by the wide open mouth and the huge eyes with color-changing flashing LEDs alone, should beware of the alternating ghostly voice or the terrible groans. In addition, the figure turns almost twice around its own axis and back again via a motorized mechanism. A drive wire, which is connected to both the motor and the hook of the suspension, guarantees the rotational movement. The figure is dressed in a typical multi-layered, frayed and holey robe in white, which looks dirty in the color gradient towards the bottom. The animation of the hanging figure is activated by integrated microphone. Her arms can be easily bent into shape.
