Description:

When gravity turns into a moment of terror. Lurking in dark corners, above narrow passageways, or hidden high above, fall mechanisms unfold their full effect. The abrupt fall of a figure from seemingly nowhere uses one of the oldest effects of horror: the sudden loss of control. This is exactly where the Fall Motor comes in, bringing movement, excitement, and unpredictability to any Halloween scene.

The EUROPALM Fall Motor is a compact motor block designed to trigger controlled falling movements in Halloween figures, spiders, or other hanging decorative elements. The motor is attached using an adjustable Velcro strap, allowing for flexible and secure mounting. Suitable attachment points include trusses, ceiling beams, railings, stair structures, pavilion struts, or sturdy branches. This makes the Fall Motor equally suitable for professional event organizers in event halls, tents, or amusement parks, as well as for private decorations in the house, on the balcony, in the carport, or in the garden.

A spring with a sturdy carabiner is located on the underside of the motor block. Halloween figures, spiders, or other lightweight decorations with a maximum weight of 1.5 kilograms can be securely attached using this carabiner. The integrated spring ensures smoother movement and reduces jerky motion during the fall. To ensure trouble-free operation, make sure that the cord can be fully unwound. Only with sufficient drop height can you prevent the cord from becoming tangled or blocked and losing its effect.

The Fall Motor is a versatile technical basis for dynamic horror effects and complements both animated Halloween figures and classic hanging decorations. When positioned correctly, it creates an unforgettable moment of surprise that makes every scene feel lively and unpredictable.

Logistique

EAN / GTIN: 4026397753332
Poids: 0,66 kg
Longueur: 0.15 m
Largeur: 0.09 m
Hauteur: 0.18 m

Caractéristiques:

- Durée d'animation jusqu'à 45 secondes

Données techniques:

Alimentation électrique:	5V CC Ou 6V CC
Puissance totale de raccordement:	3 W
Type de protection:	IP20
Classe de protection:	SK III
Branchement électrique:	Alimentation électrique via USB C (W) version encastrable Tramite Pile/batterie (non incluse dans la livraison) Tramite
Batterie:	4 x Mignon (AA) (non incluse dans la livraison)
Effet:	Via Capteur de mouvement,Capteur acoustique ou palpeur Durée jusqu'à 45s
Charge maximale:	1,5 kg
Couleur du boîtier:	Noir
Connexions:	Entrée: microphone via 1 x Prise jack 2,5 mm (stéréo) version encastrable Entrée: capteur de mouvement via 1 x Prise jack 2,5 mm (stéréo) version encastrable Entrée: interrupteur à pied via Prise jack 3,5 mm (mono)
Saison:	Halloween
Dimension:	Largeur : 15,3 cm Profondeur : 7,2 cm Hauteur : 10,2 cm
Poids:	0,57 kg
Longueur du câble:	3 m
Type de prise:	Prise jack 2,5 mm (stéréo)
Longueur du câble:	3 m
Type de prise:	Prise jack 2,5 mm (stéréo)

Contenu de la livraison:

- 1 x Appareil
- 1 x crochets
- 1 x capteur de mouvement
- 1 x microphone
- 1 x tournevis
